Flutter Develper

My Projects :

https://play.google.com/store/apps/details?id=com.maojod.maojod_app&hl=en

This is a multi-vendor online store

Selling by piece or more than one piece

It contains a complete seller control panel to control its products by adding, deleting, modifying and adding offers to products

It contains a ticket system to contact technical support if there is a problem

It contains an electronic wallet that is shipped via dedicated shipping cards from within its control panel

Payment contains two methods, either by wallet or by payment on receipt

It contains a Facebook login system as well as a private email

For the buyer, it includes a tracking system for orders
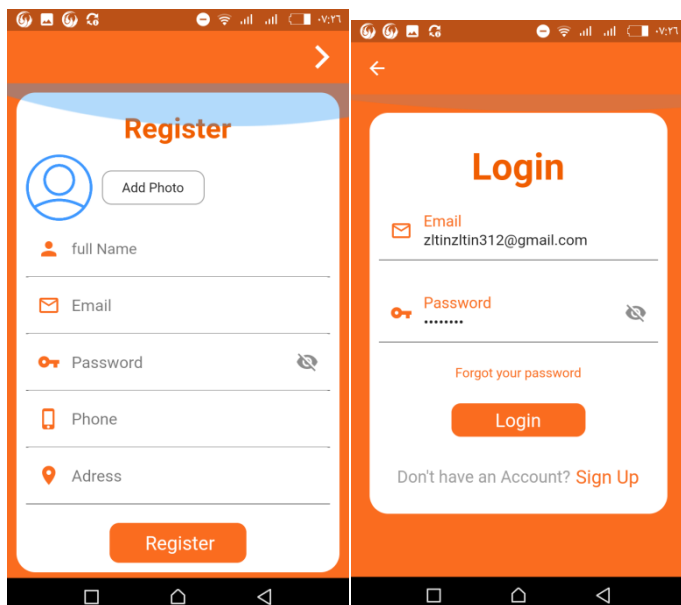

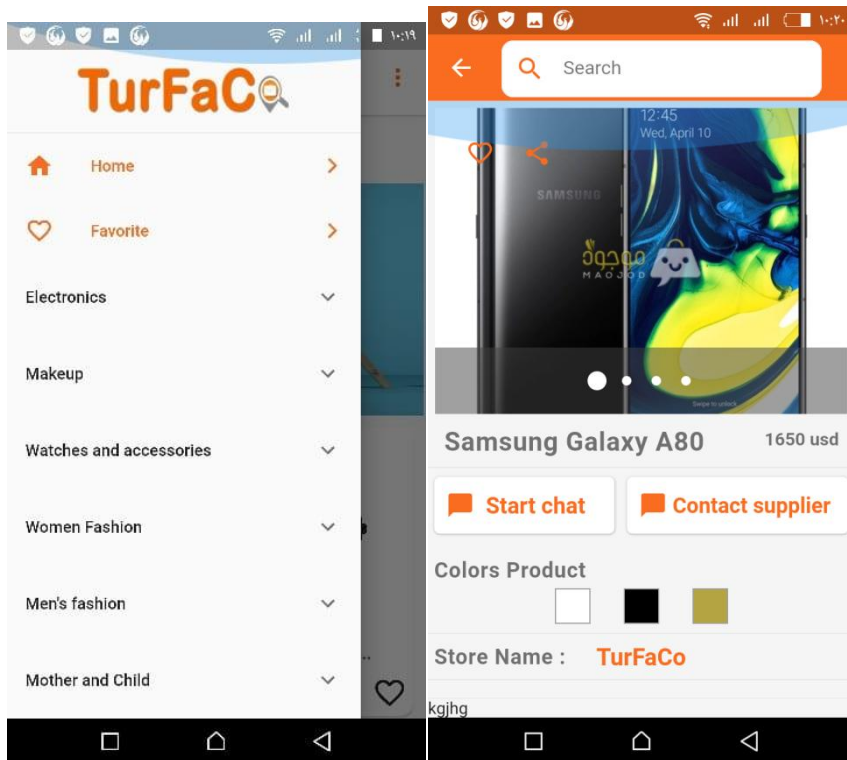

This is a multi-vendor online store

The sale is done in wholesale, not by piece

It contains a complete seller control panel to control its products by adding, deleting, modifying and adding offers to products

It contains a ticket system to contact technical support if there is a problem

Communication between the buyer and seller takes place through a conversation through which they agree on the price and quantity requested

For the buyer, it includes a tracking system for orders

Application of customer and supplier accounts
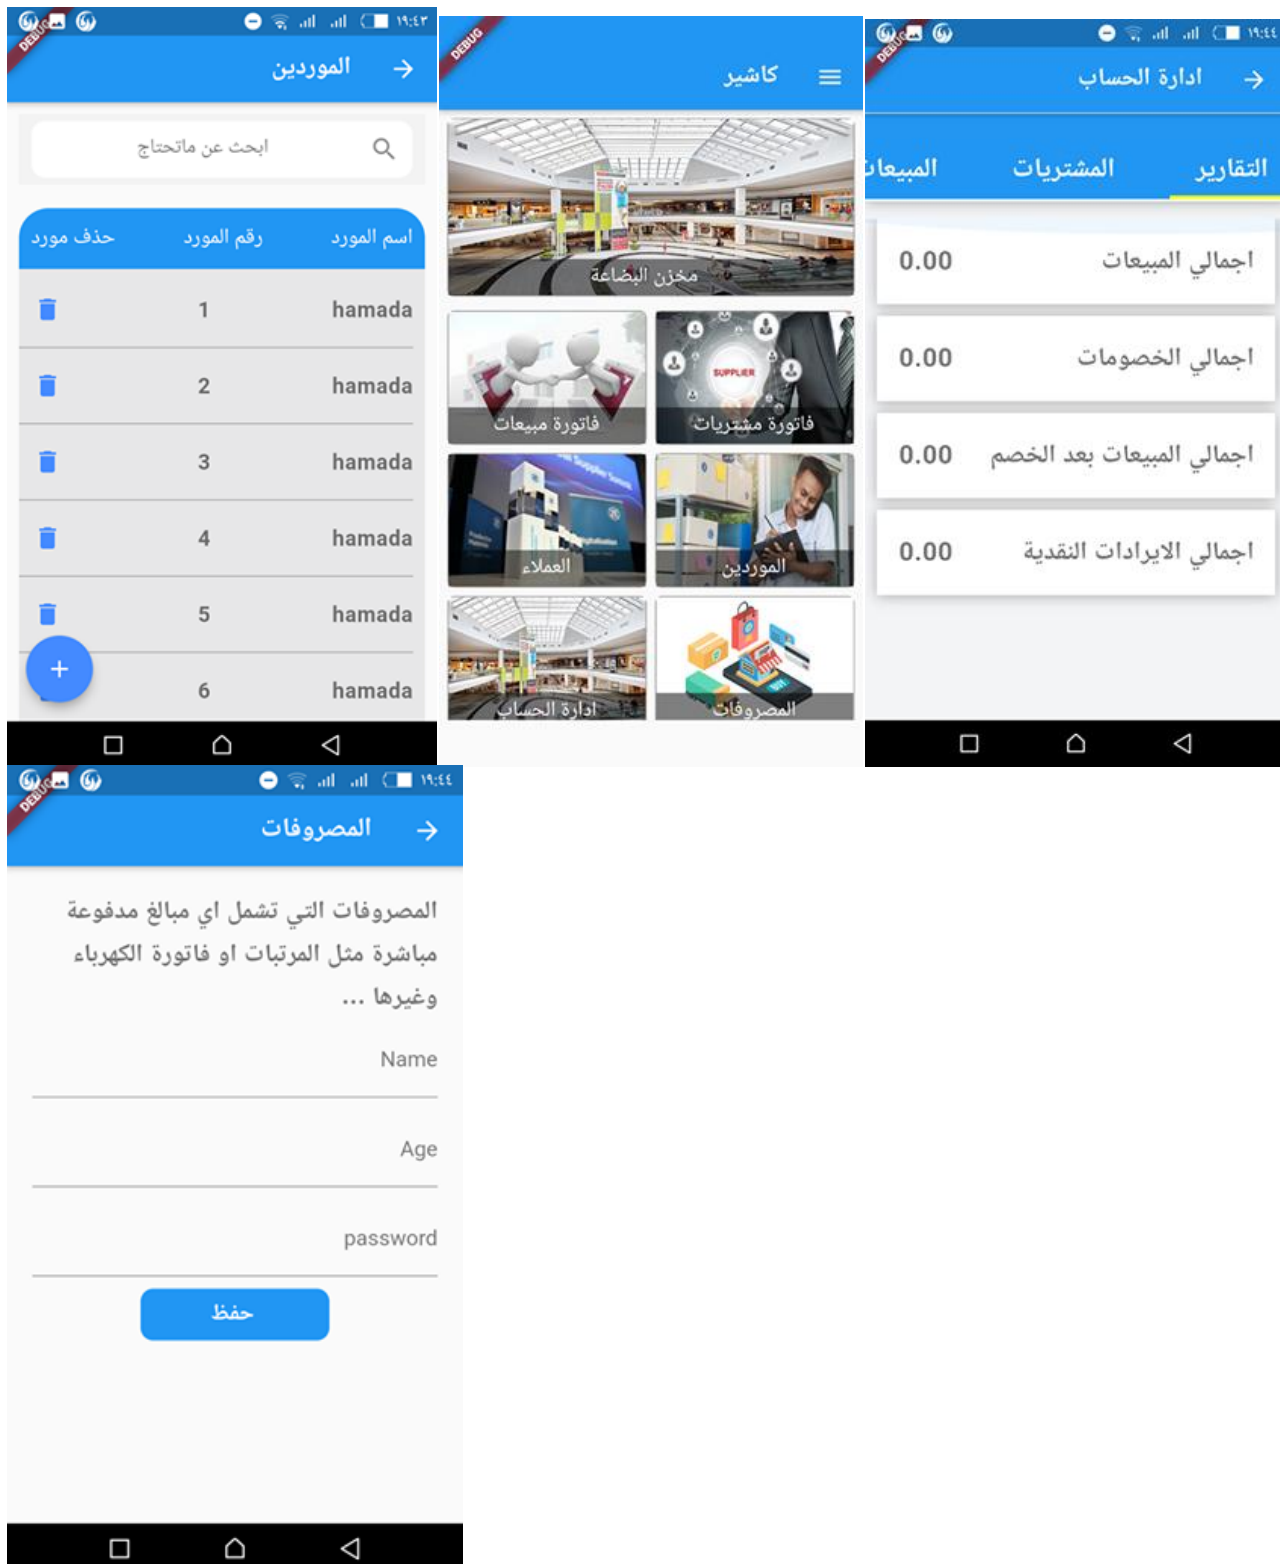

:it contains
